The 2012 USF Engineering EXPO is now over and the X-Labs show was an awesome success!

We had a couple thousand people see our show over both days, and all demos worked beautifully. On Saturday, we actually had both Tesla Coils playing music. EXPO is currently the biggest event that X-Labs participates in, and the entire X-labs team contributed a huge amount of time and work to the show. This resulted in the best show we've had so far. Our performance this year will be hard to top, but we already have new projects and improvements lined up.

For those who don't know what X-Labs is, read About X-Labs

Please email someone on the Contact X-Labs list with any questions or comments.

If you are here because you saw the show and are interested in joining the club, you are welcome to come to a meeting and see what we do besides EXPO. We will have a large meeting Friday, March 2nd dedicated to any new members or people interested in the club. If you have never been to an X-Labs meeting, please plan to attend this meeting as your first. More information including the location will be posted here as this meeting date approaches, so please check for updates. X-Labs is completely free and the only requirements are curiosity and a passion for learning. We have meetings every Friday at 4:30p.m. on the main USF campus. Meetings typically last an hour or two and we work on actual projects after the meeting.

Here is a video of the X-labs show that Joe Register put together:
